

Daily Scrum or Standup Meeting

Team name: Team 8

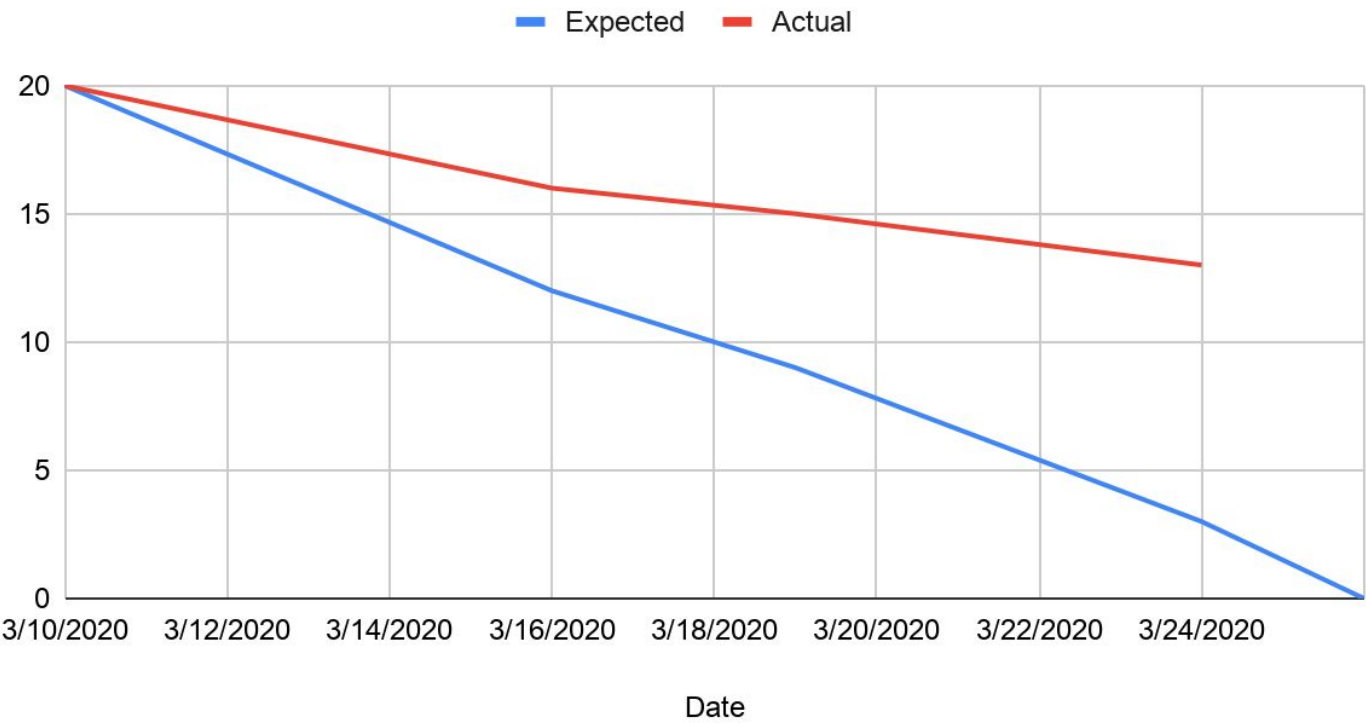

Scrum Master: Connor Geslin

Date: 3/24/2020

Team Member	What did you do since the last scrum?	What do you plan to do before the next scrum?	What obstacles do you have?
Sally D.	Made a static auction page with a title Got the login and register page functionality done.	-Complete static auction page and item page and look into getting a list of auctions from API.	Other classwork Work Quarantine
Connor G.	Tried to fully understand my issue of getting the list of winners/items. Tried to actually do stuff, couldn't figure it out. In all honesty not a lot.	Really actually try to finish both my issues by working with Hunter and putting forward a designated amount of time per day towards this hwk. Finish before the next standup so I have something to show.	Not being very good at coding/understanding. CoronaVirus. Other classes with hwk.
Hunter H.	Multiple types of items in the database	Auctions API, profile page.	Still need the Auctions API done.
Colton H.	Implemented bid supremacy security Bid api skeleton built	Get the binding api working figure out how to test this sucker (postman) Talk to Jace & Sally about making sure the calls are usable.	API framworking syntax front end interface expectations.
Jace L.	Still working on the auction api you are now able to create an auction.	Finish the auction api start on something else.	Really not understanding the auction database. other classes
